## Solving challenges for Australia's leading businesses

Prescience Technology specialises in Oracle Database and Development tools, Oracle E-Business Suite and Oracle Primavera. But what makes us different from other consultancies is the way we combine the prescience that only comes from experience, with deep technical knowledge, proven experience of successful project delivery and commercial pragmatism to drive real business outcomes. This is what we call the discipline of great project delivery.

### WE ARE

...an award-winning Oracle Platinum Partner and Oracle Approved Education Center, and one of the most experienced Oracle consultancies in Australia. With well over a decade of commercial experience helping deliver Australia's largest projects, our unique blend of targeted, technical expertise and our unrelenting commitment to continuous improvement enables us to provide insights that improve business processes.

We know Oracle applications and technologies back to front. Our seasoned consultants can create the initial solution concepts and design, assess them objectively and break them down into their smallest components, resolve issues to refine the design and build them back up into the practical and pragmatic solutions that businesses need them to be. We also have a deep and intimate understanding of how Oracle interfaces with other technologies.

### TRUSTED BY...

## Putting you in control

### WE BUILD

...long-standing relationships with our clients, most of whom are large organisations in the infrastructure, energy, telecommunications, finance and transport industries, or the public sector. We aim to develop a true understanding of each business and its challenges, which enables us to maximise the value we provide, both now and into the future.

As an independent consultancy, our clients benefit from the direct support of our management team. We have an unrivalled track record of driving results in the delivery of technology solutions, change and learning solutions, and program and project management.

### Our Services

## The discipline of great project delivery

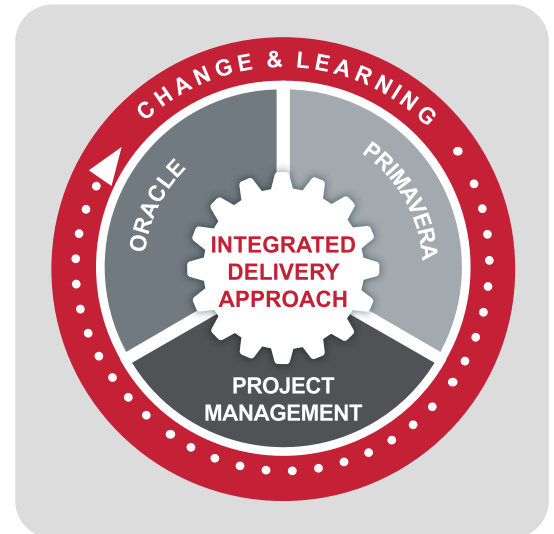

### WE KNOW

...what is required for success in Oracle and Primavera projects, including new implementations, upgrades, business transformations and support roles. We can advise on the optimal approach to support your business and technology needs, deploy small teams of seasoned professionals to lead the implementation, or provide individual resources to augment your existing team. By carefully considering the people, process and technology impacts, we deliver practical, quantifiable value to every client – safely, on-time, on-budget and to rigorous quality standards.

### WE PERFORM

...excellent work for our clients every time, examples of which include:

- Managing and coordinating all aspects of project delivery from concept development, specification, estimation, planning, construction to testing and commissioning for the design elements of various infrastructure projects;
- Leading global and domestic Oracle ERP upgrades and implementation projects with diverse and geographically dispersed stakeholder groups, facing significant timeline and resourcing constraints, delivered on-time, under budget in accordance with defined requirements;
- Making recommendations and leading the implementation of aligning cost control and work breakdown structures between Primavera P6 and the Oracle ERP system for a significant capital program for a resources company;
- Implementing Primavera P6 EPPM for a major resources company and providing ongoing support to address complex scheduling requirements at multiple sites;
- Developing an eLearning solution for a major energy provider to introduce a new user group to the Oracle E-Business suite, at the same time as introducing a new version to existing users;
- Providing comprehensive support services to thousands of users, including database administration support, Oracle Applications and Oracle Developer Tools support, and Oracle Primavera support;
- Developing a comprehensive, tailored Oracle Primavera eLearning program integrating existing operational and corporate HR processes for a multinational engineering and construction firm.

### WE DRIVE

...real and quantifiable business outcomes through our unique combination of deep technical knowledge, commercial pragmatism and the prescience that comes only from experience.

### WE RECRUIT

...only the best in their field; people who believe in and practice the constant pursuit of excellence, who learn from every situation and apply it thereafter. They also demonstrate our six core values in the way they operate, interact and deliver: talent, tenacity, teamwork, integrity, passion and prescience. It's part of what we call the discipline of great project delivery.

Contact us to see how we can help your organisation optimise your technology investment and improve your portfolio, program and project management platform.

Primavera P6 Enterprise  
Project Portfolio Management

Prescience Technology adds value through their specialist expertise. I engaged Prescience Technology in planning for an Oracle E-Business upgrade. They were a true partner - they tailored their offering and collaborated to deliver on a partnership basis, it was just what we needed.
