

ORACLE

**Platinum
Partner**

Disciplined program and project management

WE ARE

...an independent consultancy with an unrivalled ability to combine deep Oracle and Primavera expertise with disciplined project management techniques and change management strategies.

Our unique blend of targeted, technical expertise, years of commercial experience and our unrelenting commitment to continuous improvement enables us to provide insights that help clients make better technology investment decisions, improve their business processes and achieve tangible business goals.

An accredited Oracle Platinum Partner, Deltek Partner and InEight HD Partner, we understand not only the technology but also the commercial realities and the potential impact of key delivery decisions.

WE SUPPORT

...our clients in a variety of ways, including implementations, upgrades and business transformations. We can also provide project review and quality assurance services, as well as independent advice on project health and how to structure and manage programs of work. In addition, our consultants can support the request-for-quote process, business case development and system selection.

We also have experience working in D&C and EPCM environments, driving both strong operational and project based discipline.

By approaching the discipline of Project Management from all perspectives - people, process and technology - we deliver quality services and practical, quantifiable value to every client.

Results oriented, quality outcomes

WE DELIVER

...successful projects, safely, on-time, on-budget and to rigorous quality standards. Some recent engagements include:

- Managing Oracle Primavera & ERP implementation and upgrade projects
- Resourcing leading roles including project management, delivery and quality assurance on major Oracle implementations
- Management and co-ordination of all aspects of project delivery from concept development, specification, estimation, planning and construction to testing and commissioning for the design elements of various infrastructure projects
- Providing project administration capability to prepare, coordinate and facilitate the Registration Audit and the development of business management systems

WE PROVIDE

...experienced professionals who can support projects in a variety of ways:

Program Managers
or Directors

Project
Managers

Project
Administrators

Change & Learning
Leads

Technical
Analysts

Quality Assurance
Managers

The right resources, focused on your business

WE'RE FLEXIBLE

...and tailor our offering to help you achieve your business goals. We consider the expertise available client-side and determine how best to complement that experience and offer maximum benefit and value. Whether it's a large-scale construction venture or post-implementation support, or somewhere in between, we can:

- advise on the optimal approach to implementation and help plan your approach accordingly;
- partner with you to build a deep understanding of your business, and deploy small teams of seasoned professionals who have worked together previously to take control of particular areas of a project; or
- augment an existing team through the provision of individual resources.

Each of our consultants is passionate about what they do. They are tenacious, talented in their field and have the commercial acumen to put their skills into practice to proactively solve problems and manage dependencies to ensure successful delivery.

WE'RE FOCUSED

...Our consultants' extensive Program and Project Management skills are underpinned by deep technical knowledge and familiarity with the industries in which we specialise:

- Engineering and Construction
- Infrastructure
- Utilities
- Banking and Finance
- Energy and Resources
- Transport
- State Government
- Local Government

WE DRIVE

...real and quantifiable business outcomes through our unique combination of deep technical knowledge, commercial pragmatism and the prescience that comes only from experience.

WE RECRUIT

...only the best in their field; people who believe in and practice the constant pursuit of excellence, who learn from every situation and apply it thereafter. They also demonstrate our six core values in the way they operate, interact and deliver: talent, tenacity, teamwork, integrity, passion and prescience. It's part of what we call the discipline of great project delivery.

Contact us to see how we can help your organisation optimise your technology investment and improve your portfolio, program and project management platform.
