Putting you in control

WE ARE

...an award-winning technology consultancy headquartered in Brisbane and operating across APAC. With well over a decade of commercial experience helping define and optimise software solutions for Australia's largest projects, our unique blend of targeted, technical expertise and our unrelenting commitment to continuous improvement enables us to provide insights that improve business and project outcomes.

WE BRING

...broad enterprise knowledge and implementation experience to a range of software suites. We also leverage our deep project management expertise and develop an understanding of your business to optimise your technology solutions. It's this unique combination of expertise that enables us to help clients implement or upgrade and embed systems in a high value, sustainable manner.

WE DELIVER

...with clients on a partnership basis. We build long-standing relationships, developing a true understanding of each business and its challenges, which enables us to maximise the value we provide. We assist our clients to procure, provision, implement, and sustain Oracle, Deltek, InEight and Basis technologies.

WE PARTNER

...with innovative software companies to bring our clients the best solutions on the market. We are APAC's leading Oracle Platinum Partner, Deltek's exclusive Australian Acumen Partner, a certified InEight HD Partner, and BasisPM's exclusive APAC partner.

Maximising efficiency, facilitating growth

Our prompt and efficient software licensing services can help to minimise your project management costs, as well as your operational and capital expenditure. We can also help you ensure compliance while still allowing for growth.
KICKSTART
We can start the process with an assessment of your initial licence requirements and advise on the best way to structure your licence agreement.

New Requirements

ENHANCE
We can expand your usage with additional licences under an existing Licence Agreement, or extend your capability with new products, functionality or services.

New Requirements

UPDATE
We can assess your eligibility and capacity to migrate to the cloud, or upgrade your software to the latest version.

Existing Footprint

REVIEW
We can help you assess the efficiency of your software licence footprint by helping you monitor and report on usage.

Software at a glance

project solutions

ORACLE PRIMAVERA

One of the biggest challenges for project-intensive organisations is managing the portfolio of projects underway at any one time. Prescience Technology understands those challenges only too well, which is why we sell, recommend, implement and support Oracle Primavera.

Oracle Primavera is an integrated suite of products that works together to address all major project portfolio management environments. The capstone of these products is Primavera P6 Enterprise Project Portfolio Management (EPPM). P6 EPPM is widely considered the most powerful and robust solution for globally prioritising, planning, managing, and executing projects, programs, and portfolios in asset-intensive industries.

INEIGHT PROJECT SUITE

InEight's modern project-driven enterprise software helps you increase operational efficiency.

With InEight Project Suite, you can create and manage estimates, budgets and forecasts; simplify contract management; and streamline work planning and field data collection. The result is an entirely new level of project certainty, built on a disciplined approach to project controls that's proven and based on industry best practices.

DELTEK ACUMEN

A sound schedule is the key to a successful project. At Prescience Technology we are dedicated to providing project planning and scheduling solutions that help our clients deliver projects with greater ease, speed and effectiveness. Which is why we've partnered with Deltek Acumen to deliver diagnostic and risk analysis software tools that help improve the quality of project plans.

The Deltek Acumen software suite provides additional capability to quickly diagnose and resolve project shortcomings, reduce risk exposure, accelerate and align schedules with project goals and benchmark quality and performance. The software integrates directly with all major project controls systems.

BASIS

Basis is designed to help organisations build better plans in less time. Use your CPM tool to execute your project, use BASIS to ensure the plan being "executed" is achievable.

BASIS is an interactive planning tool created to improve the predictability of plans, the accuracy of forecasts and feasibility of risk analysis outcomes. Iris, the first artificially intelligent planning assistant learns from every user interaction and presents knowledge back during planning.

finance solutions

ORACLE E-BUSINESS SUITE

Oracle E-Business Suite is widely considered the most comprehensive suite of integrated, global business applications that enable organisations to make better decisions, reduce costs, and increase performance.

With hundreds of cross-industry capabilities spanning enterprise resource planning, customer relationship management, and supply chain planning, Oracle E-Business Suite helps manage the complexities of global business environments, no matter your organisation's size.

systems solutions

ORACLE DATABASE

We understand that your data is a precious resource; and with exploding data volumes and increasingly complex data management requirements, it is more important than ever to be proactive about your data storage and administration.

Oracle Database is the world's most popular database, providing organisations of all sizes with access to the world's fastest, most scalable and reliable database technology in a cost-effective, cloud or hybrid environment.
