

Launch your team's Oracle learning journey

Tailored, relevant and accredited Oracle
training from Prescience Technology.

Is your team getting the most from your IT investment?

How structured team training can help you reap rewards:

KEEP UP WITH INDUSTRY CHANGES

Industries are constantly changing and it is important for every organisation to develop to avoid being left behind. It's also important to make sure your business is complying with any industry regulations. Ongoing training ensures your team's skills and knowledge are up-to-date.

IMPROVE YOUR ROI ON ENTERPRISE SOFTWARE

Change is the only constant when it comes to technology. Regular training ensures that teams are using the latest technology comfortably and to its full potential. Powerful enterprise systems are expensive – team training helps improve your ROI by ensuring it is used consistently and to its full potential.

INCREASE JOB SATISFACTION LEVELS

Continued investment in training and development from the business can result in a much higher sense of job satisfaction. This reduces employee turnover and increases productivity, which directly improves profitability and prevents your competitors from taking away your best team members.

NURTURE & MAINTAIN KNOWLEDGE & SKILLS

Although one-off training may be provided to new starters as part of an induction, it is also important that training programs are put in place to help develop users' skills throughout their employment. To retain knowledge, skills need to be practiced and refreshed on a regular basis so elements aren't forgotten.

ADVANCE EMPLOYEE SKILLS

Once a business has spent money on providing basic level skills, these can easily be built upon and improved to provide much more benefit to the business. Staff that know more can bring more to the table, and your business will reap the rewards.

STAY AHEAD OF COMPETITORS

Standing still can kill your business, so by making sure your staff are constantly advancing, you will continue to move forward and remain competitive in the marketplace.

Why run Oracle systems training?

GET THE MOST FROM YOUR TEAM

A well trained team is like an insurance policy that pays out early.

The reality is, that a simple manual is not enough for employees to maximise the potential of Oracle's powerful enterprise software.

In a changing business environment, structured systems training puts teams in control and will allow you to maximise ROI and enhance productivity.

ORACLE SOFTWARE REQUIRES ORACLE EXPERTS

Oracle enterprise systems are incredibly powerful, but can also be necessarily complex. Using these systems to their full ability requires advanced users.

As an Oracle Approved Education Center, all of our courses have been approved by Oracle and are delivered by expert practitioners.

Our Oracle University courses have been developed by the same teams involved in the development of the products.

COMBAT ISSUES BEFORE THEY START

To stay ahead, some organisations upgrade their IT systems, others implement new technology and some reduce the workforce, reassigning tasks across the team.

All of these changes can have an impact on productivity, ROI, team dynamics and your ability to manage business commitments.

You can protect your business and make it stronger by investing in training.

Why Prescience Technology?

THE TRUSTED NAME IN ORACLE TRAINING

Prescience Technology is the most experienced and highly awarded Oracle consulting firm in Australia. We have trained thousands of Oracle users and supported Australia's largest projects for well over a decade.

OUR TRAINERS ARE TEACHERS & PRACTITIONERS

Our unique blend of targeted, technical expertise and our unrelenting commitment to continuous improvement enables us to provide insights that improve learner outcomes and equip users with the practical skills they need.

ORACLE UNIVERSITY ACCREDITED

As Australia's only Oracle University Education Partner, we offer tailored, relevant and accredited training conducted by expert local trainers. All our Oracle University courses are backed by Oracle's 100% Satisfaction Guarantee.

Flexible delivery options

CLASSROOM TRAINING

Classroom training delivered by our local expert trainers in classrooms throughout Australia. Benefit from hands-on activities, in-class discussions and instructor Q & A.

LIVE VIRTUAL CLASSES

Train from anywhere with an internet connection. Instructors teach students in real-time via a live virtual classroom.

DEDICATED TEAM TRAINING

Accredited Oracle training customised to your needs and delivered to your entire team, when and where you need it. You set the date, time and location.

TRAINING ON DEMAND

Available any where, any time. Choose from our proprietary suite of eLearning, Oracle University's online Training on Demand, or we can develop a custom solution with you.

Case Study

“ In implementing this training we needed to make sure that all engineers involved in project planning and scheduling, regardless of their role, location or maturity, could learn this discipline and use Oracle Primavera P6 in a consistent way. ”

Group Manager, Controls & Planning
Global Engineering & Construction Firm

The 'Primavera P6 for Engineers' course developed by Prescience Technology addressed the identified challenges by delivering:

- Fully customised Instructor Led Fundamentals training course for Engineers.
- Customised online Fundamentals training course for Engineers, optimised for delivery in low-bandwidth locations.
- Leighton Contractors specific training deliverables including training data, manuals, online simulations and online training portal.
- Multiple training delivery options including: onsite instructor led training, and on demand web based training courses.
- Course reviews, updates and assessments to ensure consistency of delivery and knowledge transfer across the different delivery methods.

What our clients say

Prescience Technology was responsible for some great out-of-the-box thinking that invigorated our staff and helped ensure cut-through to get people's attention.

Project Manager
Leading Energy Provider

“

Prescience Technology tailored their offering and collaborated to deliver on a partnership basis, rather than take total ownership. It was just what we needed.

Strategy & Enterprise Architecture Manager
Major Australian Manufacturer

”

Let us guide you on your learning journey

Introducing or upgrading your IT systems will inevitably have an impact on business processes, productivity, ROI and team dynamics. The most successful system implementations consider these issues in the planning process.

We partner with you to develop change and learning strategies encompassing structured systems training to ensure early and sustained adoption.
