

Putting you first

Getting the most from your project controls software investment, protecting against risks and maximising system availability are critical to sustaining successful projects. Your project controls system should support your project team, not the other way around.

The Prescience Project Driven Cloud is a secure, integrated and high performing project controls platform, powered by Oracle. With the Prescience Project Driven Cloud, our local team of Oracle Primavera Specialized support engineers not only take care of your project controls systems, but also have the expertise to provide ongoing functional support.

Let our experts help you optimise, protect and sustain your project controls system, while you focus on your core business.

Putting you in control

Many organisations don't feel a cloud solution can be fit-for-purpose. Unlike many other cloud providers, with the Prescience Project Driven Cloud, you are in control. We strive to maintain a balance between flexibility and support; we offer regular patching to protect you against threats and maintain downtime, with no forced upgrades.

Your cloud partner

Oracle Primavera's No. 1 Cloud partner in JAPAC, Prescience Technology is an award-winning technology consultancy. Our unique blend of targeted, technical expertise, years of commercial experience and our unrelenting commitment to continuous improvement enables us to provide insights that help clients make better technology investment decisions. An accredited Oracle Platinum Partner and Oracle Primavera Specialist, we understand not only the technology but also the commercial realities and the potential impact of key delivery decisions.

100% Australian-based

Our support engineers and data centres are located onshore, in your timezone.

Flexible & Scalable

From complete managed cloud services to infrastructure hosting, we can tailor a solution for you.

Safe & Secure

Aligned with the ISO 27001 code of practice for information security controls.

CLOUD BENEFITS FOR MAJOR PROJECTS

Reduced Infrastructure Costs

Simplified Installation & Upgrades

Increased Flexibility & Scalability

Improved Remote Location Access

Flexible cloud services

The Prescience Project Driven Cloud provides you with end-to-end managed services delivered in the cloud and managed by Prescience Technology. This service enables you to accelerate time to deployment, increase availability and system performance, and reduce business risk.

The Prescience Project Driven Cloud goes beyond core infrastructure and application management to provide you with services that span the entire software lifecycle, from migration, testing, and deployment to compliance and disaster recovery.

You choose the best deployment model for your business needs. Easily scale up or down to respond to changing business and market requirements.

We can:

- Host, manage and support all project controls and ERP environments, from production and development to testing and disaster recovery.
- Host your development or testing environments in the cloud while maintaining your production environment on-premises.
- Manage your disaster recovery by replicating your data in the Prescience Project Driven Cloud, providing you with instant access to your data when something goes wrong.
- 'Lift & Shift' your on-premises loads to the Prescience Project Driven Cloud with minimal configuration.
- Host, manage and support both Oracle and non-Oracle applications as the single point of contact for your team.

STANDARD MANAGED SERVICES	
Hours of Operation*	8AM - 5PM MON - FRI
Service Levels	✓
Logging & Managing Vendor SRs	✓
Dedicated Service Delivery Manager	✓

*Extended hours and optional extras can be included as part of a custom managed services agreement.

Which applications can I migrate?

The Prescience Project Driven Cloud is an Oracle Primavera centric platform, powered by Oracle Cloud technology. It is designed to be a fully integrated project controls platform, including integration with third party products. Our cloud supports all Oracle Primavera and ERP products, as well as accompanying project controls systems – including Deltek Acumen, InEight and Basis – facilitating a smooth user experience.

Where is my data stored?

With strong government experience, we know how important data sovereignty is. We are 100% Australian-owned and all of our data centres and support engineers are based in Australia.

Contact us to find out how we can help you optimise your technology investment and improve your portfolio, program and project management platform.
