Aim higher

What if...
Project Controls became an experience?

Immersive Project Controls Services

What is Immersive Project Controls – IPC

IPC is a revolutionary method of elevating Capital Projects performance, where accelerated project outcomes will be delivered through process optimisation, unique data analysis and training, conducted by the award-winning Prescience Technology team.

IPC uses the immersive experience provided by the Mission Room hardware, software, and visual delivery to achieve **Actionable insight: Real Control.**

Benefits

Elevated learning experience: Immersive simulations foster heightened engagement, improved information retention, and the hands-on development of practical engineering skills.

Real-world application: By bridging the gap between theory and practice, IPC empowers your staff to apply theoretical knowledge in real-world scenarios.

Cultivation of collaborative skills: The platform facilitates collaboration and communication, nurturing teamwork, and effective problem-solving - an invaluable tool in Australian Project Controls.

Mitigated risk & reduced costs: Potentially hazardous or expensive real-world experiments are supplanted by risk-free virtual practices, saving costs and time.

Competitive edge: Embracing innovative learning methodologies bolsters your organisation's standing and ensures that learners are well-prepared for the dynamic demands of today's Project Controls.

What is Mission Room

Cine setup specifications

- Standard System 5760 x 1080
- Touchscreen interactivity
- Projection or TV based
  - 3.7m, 4.3m, 5.0m wide display (TV)
  - 6.0m, 7.0m wide display (projection)
- LED or laser projection options
- Standard height 2.35m
- Audiences of up to 30 (size dependent)
- Host of user interface options

mission room

Mission Room supply unique, interactive and immersive displays which are ideal collaboration tools that allow project teams to understand issues, gain insights and develop solutions quicker.

Mission Room offers custom-built, immersive and touchscreen displays to get the most out of any content. With designs that can be rescaled and modified to fit any space, audience and application.

IMMERSIVE project controls

IMMERSIVE
project controls

Elevate your Capital Project's performance to new heights with Immersive Project Controls

Are you ready to take the way you experience Project Controls to the next level? Step into an environment where cutting-edge software and hardware unite to immerse you in your Capital Project's data.

This immersive experience fosters total focus, providing you with Actionable Insights that empower you to take Real Control.
